No service contracts

No monthly fees

No installation

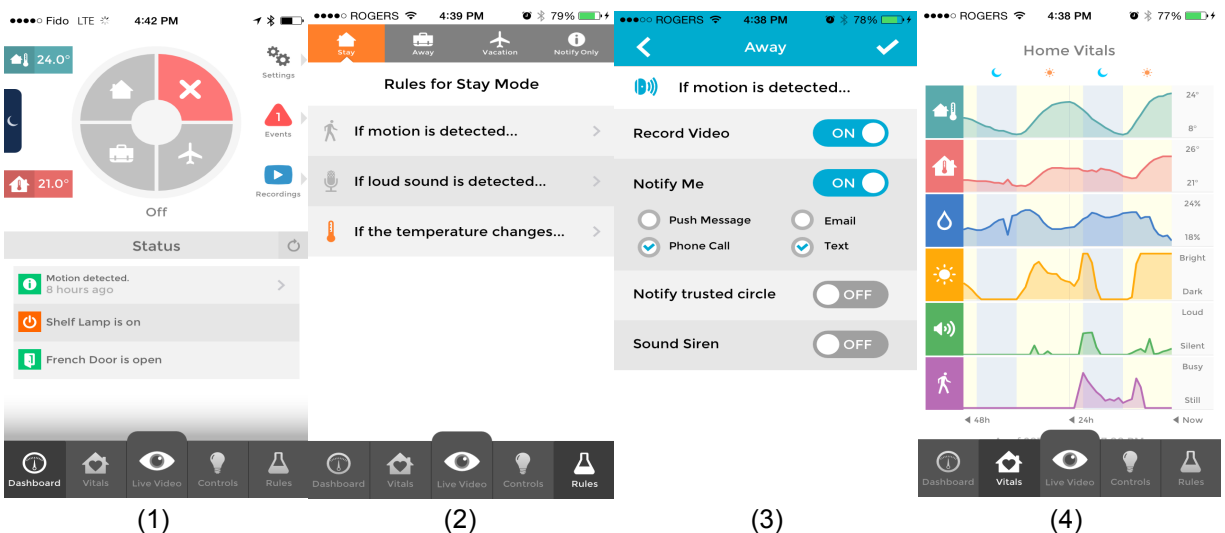

[Piper](#) is the way to monitor and interact with your home.

It's the first all-in-one home security and automation device that combines panoramic video, Z-Wave home automation and environmental sensors into a single elegant product that you interact with on your smartphone or tablet.

Piper's features include:

- **Security:** Customize three security modes (home, away and vacation), motion detector and piercing, 105-decibel siren. (2,3)
- **Automation:** Integrate Z-Wave accessories into Piper's security modes, control them remotely, on a schedule, or using environmental data. (1, 2, 4)
- **HD Panoramic camera:** 180° fisheye lens, electronic pan, tilt, and zoom, 1080p camera sensor.
- **Customized alerts:** Phone call, text message, email, and push notifications to users and their trusted circle when security rules are triggered. (3)
- **Environmental sensors:** Monitor and control home temperature, humidity, ambient light and sound. (4)
- **Elegant Design:** Simple, intuitive app. Stunning, compact, two-toned form with brushed metal legs.
- **Smart Hardware:** ARM processor, battery backup, internal memory for video storage, 802.11b/g/n Wi-Fi.
- **Android & iOS support:** Available on Android and iOS smartphones and tablets.
- **Two-way audio:** Talk directly to occupants through Piper through its app on your mobile device.
- **Multi-Piper functionality:** Support up to five different Pipers within a home so you always have visibility and control over your different spaces.
- **Bedside mode:** Featuring an active panic button, Bedside mode lets users manually turn on a siren in case of an emergency. Easy to reach and quick to access for fast action, users can now set Piper to Bedside mode before going to sleep for a more secure environment at night.

Pricing & Availability:

Piper comes in white and black and is available at getpiper.com or the Amazon Home Automation store starting at \$199 USD / €149 EUR.

Company Background:

Piper was created by Russell Ure, who co-founded Blacksumac with John Criswick in 2012. Blacksumac and the Piper brand were acquired by Icontrol Networks in April 2014. Icontrol Networks provides a connected home solution for every household, so people worldwide spend less time managing their lives and more time living them.
