

TL1000

Multimeter Lead Set

The TL1000 test lead set is a universal leadset for multimeters and clamp meters fully conformant to EN61010 with a safety standard of CAT III 1000V. The leads are double insulated to 1000V and the test probes are fitted with GS38 compliant covers. The TL1000 is also supplied with mini croc clips for extra low voltage (ELV) testing.

Compatible with most multimeter and clamp meters with an input terminal size of 4mm

Features

- Double insulated 1000V rated test leads
- GS38 compliant probe tips
- Supplied with 50V rated croc clips
- 4mm input shuttered connectors
- Lead length 1.5M
